SUMMARY

- Around 5 years of experience as a highly-skilled MERN Stack, Django, Front-End, Back-End, and UI/UX Developer.
- Proficient in JavaScript, Python, jQuery, NextJS, NodeJS, ExpressJS, ReactJS, Django, MongoDB, Postgresql, and MySQL.
- I worked individually and in teams as a leader with large enterprises and startups.
- Strong leadership skills, having led development teams to implement microservices-based architectures, resulting in a 30% reduction in infrastructure costs.
- Managed the development process for 7+ projects from conception to deployment.

SKILLS

Front-end Development

React JS Webpack (JS/HTML/CSS) React/Next Redux Responsive Web Design Web performance Optimization Cross-Browser Compatibility UI/UX

Back-end Development

Node JS Express JS Django Open3d LIDAR Restful API Typescript GraphQL SQL Server MySQL MongoDB NoSQL Databases Caching Strategies (Redis, Memcached) C/C++

Cloud and Deployment

AWS (EBS, EC2, Route53, S3, Lambda, ECS) Heroku Kubernetes Docker

CI/CD and Version Control

GIT Jenkins Travis CI Circle CI GIT Command Line CI/CD

Project Management Tools and Content Management System

Jira Trello Huly Basecamp GitLab Microsoft Project Asana

PROFESSIONAL EXPERIENCE

Technical Lead

06/2025 – Present

AIO 

- Engineered scalable, event-driven backend services using **NestJS** with a fully **TypeScript** codebase.
- Secured authentication and authorization flows via **AWS Cognito**, including token management and session handling.
- Designed and optimized **real-time event delivery** using **MQTT** for POS devices and **SSE** for KDS devices.
- Built resilient **inter-service communication** pipelines with **AWS SQS** and **BullMQ (Redis)** for background job processing.
- Implemented **Redis caching** strategies to reduce database queries and improve API performance.
- Developed **AWS Lambda functions** for serverless event handling, file processing, and backend automation.
- Configured monitoring and auditing with **AWS CloudWatch** and **CloudTrail** to ensure observability and compliance.
- Designed and maintained **S3-based file upload workflows**, including secure access and lifecycle policies.
- Deployed containerized services on **AWS ECS with Fargate**, ensuring scalable, cost-efficient infrastructure.
- Automated build, test, and deployment pipelines with **GitHub Actions** for CI/CD.
- Standardized builds and linting workflows using **Nx**, ensuring consistency across a monorepo environment.
- Collaborated cross-functionally to design distributed, fault-tolerant systems aligned with business requirements.

- Conducted code reviews, enforced best practices, and mentored team members on TypeScript and NestJS patterns.

Senior Software Engineer

Galixo 

09/2024 – 05/2025
Rawalpindi, Pakistan

- Developed scalable, high-performance web applications using **React**, **Next.js**, **Node.js**, and **NestJS**.
- Designed **modular and reusable components** for consistent, efficient user experiences.
- Delivered secure, optimized applications using **Laravel** for the backend and **Next.js** for server-side rendering.
- Built **RESTful** and **GraphQL APIs** for seamless frontend and third-party integrations.
- Enhanced **security** with **OAuth 2.0**, **JWT authentication**, and **encryption**.
- Created APIs for advanced features like **text-to-speech**, **image-to-text**, and **machine-learning models**.
- Implemented mechanism for **LIDAR scanning** with **Open3d**.
- Integrated **Python-based ML models** into **Web & Android platforms** for real-time text-to-speech and image-to-text functionalities.
- Deployed **scalable, low-latency ML models** with **performance optimization**.
- Automated deployments with **CI/CD pipelines** using **Jenkins**, **GitHub Actions**, and **Docker**.
- Directed **cross-functional teams** to deliver complex projects aligned with business goals.
- **Mentored junior developers**, conducted **code reviews**, and implemented **best practices** in software engineering.

Software Engineer

Devsinc 

02/2022 – 09/2024
Islamabad, Pakistan

- Created a **responsive web application** utilizing **Node.js** and **React.js**, improving **UI/UX**, resulting in a **25% boost in user engagement** and a **45% reduction in load time**.
- Guided a team of developers in building a **microservices-based architecture** with **AWS Lambda** and **API Gateway**, leading to a **30% decrease in infrastructure costs**.
- Applied **Virtual Assistant with LLMs** for **e-commerce sites** using **Python Machine Learning**.
- Implemented backend enhancements in **Django**, achieving a **50% increase in API performance**.
- Designed a **CI/CD process** with **Jenkins** and **Docker**, resulting in a **60% reduction in deployment time**.
- Utilized **WebSockets** and **Node Streams** to deliver **real-time file serving** and **connectivity services** to clients.
- Employed **OKTA** and **custom Passport strategies** to enhance **user sign-on** and **third-party integration** with the platform.
- Developed the platform using **NestJS**.

Full Stack Engineer

CatalyzeX 

09/2021 – 04/2023

- Utilized ReactJS, NodeJS, and PostgreSQL to create and maintain a large-scale e-commerce platform that led to a 20% increase in sales and a 35% decrease in bounce rate.
- Implemented a caching strategy utilizing Redis and Memcached, resulting in a 65% decrease in database load and a 45% improvement in page load times.
- Developed a private NPM package utilizing TypeScript, leading to 70% code reusability.

CERTIFICATES

- AWS Certified Cloud Practitioner 
- AWS Certified Solution Architect Associate 

EDUCATION

Bachelor of Computer Science

National University of Computer and Emerging Sciences
